

KanCare Website Tutorial Transcript
Dr. Susan Mosier

Hi, I'm Susan Mosier, Kansas Department of Health and Environment Director of Medicaid.

Welcome to the KanCare website. Here you will find everything you need to know about our new Medicaid program, KanCare.

KanCare is our plan to improve the health of Kansans and sustain this valuable program for our state's most vulnerable citizens.

Let's take a brief tour of this website. KanCare-dot-k-s-dot-gov. On this website, you will find four main sections—an about us section, a section that details all of the KanCare policies and reports, a section with information for consumers and another section with information for providers.

If you're a consumer, you can learn all about the benefits and services available to you and how to choose a health plan. You can also find out how to enroll in KanCare and view frequently asked questions.

If you cannot find an answer to your question here, go to the bottom of the events page to see a list of previously asked questions and their answers. If you still need help, you can call the KanCare consumer assistance line listed at the top of the home page.

If you're a provider, you can stop here to find out how to become a provider in KanCare. There's also information about the health plans and a list of future events related to KanCare for providers.

Thank you for stopping by the KanCare website.
